Lab 7 - Student Work Distribution

- Isaac E.
    - Tried to debug the code in regards to the FIFO's and UART communication
    - Don't think I did much in that regard as the project still does not work correctly
- Jacob S.
    - Attempted to rework the FIFO and UART RX module in order to account for two FIFOs with buttons for pulling into barrel shifters
    - Cleaned up wiring in top module in order to work with new UART, wrote constraint and tried to debug demo
- Adrian A.
    - Assisted with Top_File and constraint.
